Build Your Own Brain, page 1

Your brain has a lot of different parts that work together to make you happy, to help you learn, and to let you dream. Find out more about the parts of the brain by building one of your own!

1. Color in the brain parts using crayons, colored pencils, or colored markers.
2. Cut out the parts and use the map on page 2 to Build Your Brain!

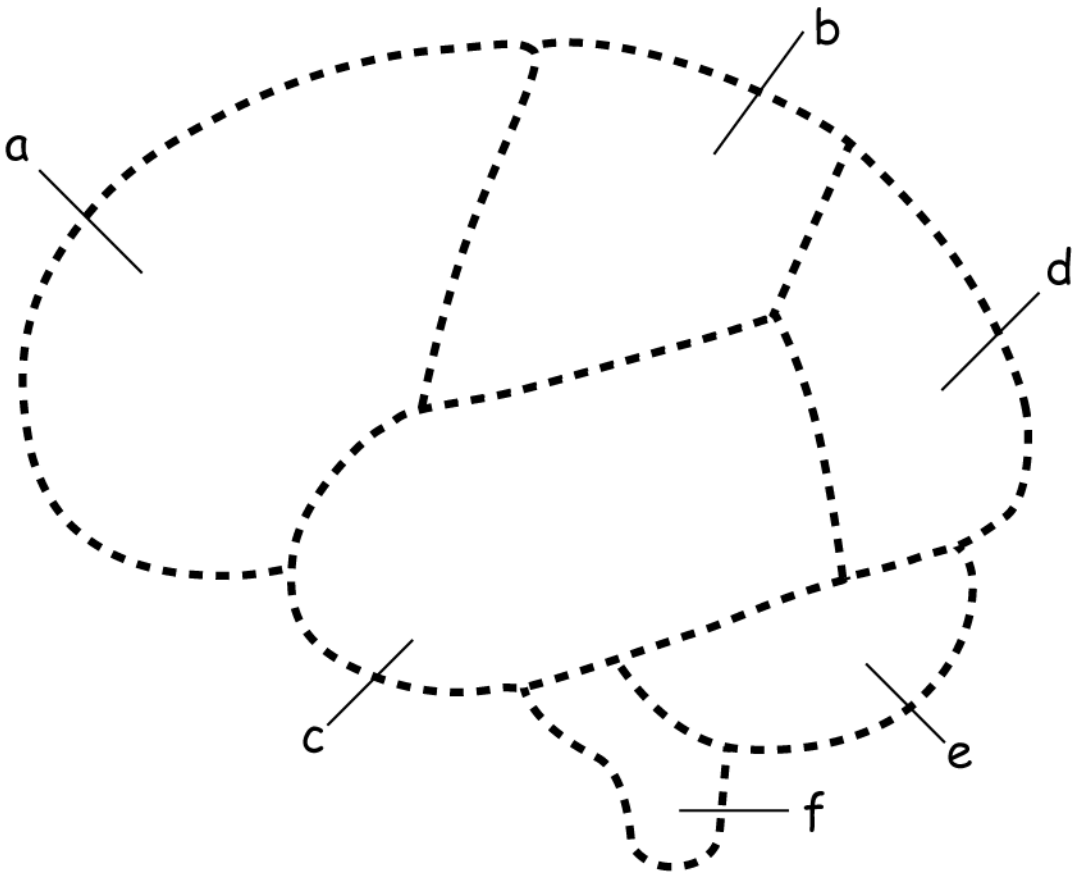
Name _____ Date _____ Class _____

Build Your Own Brain, page 2

Match the brain parts from page 1 with this Brain Map. Glue the pieces onto the map to Build Your Own Brain!



a. Frontal lobe--Setting goals, planning, feeling emotions.

b. Parietal lobe--Feeling softness or hardness, feeling temperature and pressure, and activating your muscles.

c. Temporal lobe--Recognizing faces, objects, and sounds; also important for making memories.

d. Occipital lobe--Interprets everything you see.

e. Cerebellum--Maintains your balance and coordination, helps you walk and move around.

f. Brain stem--Regulates vital functions like breathing, eating, and your heartbeat.
